# **Snorkel Al** Enterprise Al Made Practical

# CAPABILITY STATEMENT

Snorkel AI, Inc. is a Series C startup company founded in 2019 by a team spun out of the Stanford AI Lab and backed by some of the most distinguished venture capital firms in Silicon Valley and beyond, including Greylock, Accel, GV (Google Ventures), Blackrock, Lightspeed, In-Q-Tel, and SV Angel. Snorkel's technology is already in use by leading AI/ML organizations like Google, Apple, Intel, and large enterprise customers across banking, insurance, telecom, retail, pharma, energy, defense/intelligence, and more.

PRODUCT: Snorkel AI's software product, called Snorkel Flow, accelerates enterprise AI application development by enabling your in-house subject matter experts (SMEs) to label massive amounts of machine learning (ML) training data in hours, without requiring armies of outsourced labelers spending months painstakingly labeling data by hand. Snorkel Flow can be deployed in the cloud or on-premise with no external dependencies.

#### SERVICES:

- Deployment & Integration
- User Training & Support
- Al/ML Application Design
- Explainability & AI Security Data Readiness & Labeling
- Al Strategy Development
  - Tech Talks & Keynotes
  - Executive AI/ML Training

# **UNIQUE DIFFERENTIATORS:**

Snorkel Flow is the only ML development platform powered by weak supervision and programmatic labeling, greatly reducing the time required to build AI/ML applications. By leveraging domain expertise from SMEs and other knowledge resources to automate the labeling process, Snorkel makes enterprise AI application development fast and practical, unlocking the power of AI/ML without the bottleneck of hand-labeling. Snorkel's founders include professors from the University of Washington (CEO) and Stanford, with a team of industry veterans from Google, Facebook, Apple, Amazon, Microsoft, and NVIDIA.

## **KEY BENEFITS:**

Faster Development Build AI applications 10-100x faster via programmatic labeling

Adaptable Applications Iteratively adapt to changing data or business/mission goals

Collaborative Workflows Bring together data scientists & SMEs to build solutions High-Accuracy Models Increase predictive performance by iterating on training data

Trustworthy AI Unprecedented auditability & explainability across the entire workflow

Privacy-Safe Labeling Keep all your data in-house & minimize sensitive access

## **TOP USE CASES & APPLICATIONS:**

#### **Banking & Finance**

- Contract Compliance
- Anti-Money Laundering
- Trading Strategies

#### Software

Spam Filtering

• Question Answering

Social Media Analytics

Brand Monitoring

Google intel Microsoft Stanford accenture

Retail

- Sales & Marketing Analysis Network Optimization
- **Government & Public Sector** Insurance Intelligence Analysis
- Fraud Detection • Knowledge Management
  - Claims Processing
  - Risk Classification

#### **Telecom & Cyber**

- Traffic Monitoring
- Intrusion Detection

(DARPA)

# **CURRENT FEDERAL CUSTOMERS & PAST PERFORMANCE:**

Multiple U.S. Intelligence Community and Department of Defense agencies

Policy Compliance
